MongoDB Installation

Version to be installed -> 7.0 (Latest)

Windows

We have to set up 2 things :

1. MongoDB Community Server
2. MongoDB Shell

Youtube video (for Complete Installation help) :
https://www.youtube.com/watch?v=h2x6BmUi5zQ

For **MongoDB Community Server**
Go to link : https://www.mongodb.com/try/download/community

For **MongoDB Shell**
Go to link : https://www.mongodb.com/try/download/community

Mac

Youtube video (for Complete Installation help) :
https://www.youtube.com/watch?v=NLw7TIn6IeM

Note - In the YT video, installation for version 6.0 is shown, but you have to install the latest version, which is 7.0. The rest of the process and commands will remain same.
