ABOUT ME

I'm a motivated and curious B.Tech student specializing in Artificial Intelligence and Data Science, graduating in 2026. My core interest lies in data visualization, where I use tools like Power BI, Tableau, Matplotlib, and Seaborn to uncover insights and present data in a meaningful way.

CERTIFICATION

Power BI-simplilearn-2025
introduction to databases-simplilearn-2025
data analysis with python-cognitiveclass.ai-2024
python 101 for data science-cognitiveclass.ai-2024

SKILL

programmimg: python, html, css, javascript, sql
visualization & BI: power BI, tebleau, matplotlib, seaborn
Soft Skills: problem-solving, Teamwork, communication, Quick learning

PROJECT

-AI Chatbot for Judiciary System | 2025
Frontend Developer
Built a responsive web-based chatbot for the Department of Justice using HTML, CSS, and JavaScript. Integrated with Python backend to provide legal information through conversational interface. Focused on UI/UX and chatbot interaction flow.

-Student Performance Predictor | 2025
Data Analyst
Developed a machine learning model using Python and Scikit-learn to predict student outcomes based on attendance, study hours, and marks. Visualized performance trends using Seaborn and Matplotlib.

-Movie Box Office Trends | 2025
BI & Visualization Project
Analyzed and visualized Bollywood and Hollywood box office data using Power BI and Tableau. Created interactive dashboards showing trends by genre, year, and revenue.

EDUCATION

Maharashtra Institute of Technology, Aurangabad | 2023–2027

B.Tech – Artificial Intelligence & Data Science
Currently pursuing Bachelor's in AI & DS with a focus on machine learning, data analytics, and frontend development. Gained experience through academic projects and certifications. CGPA: 7.8
BAMU University | 2023-2026
