PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer with hands-on experience in building secure web applications using Node.js, Express.js, and MongoDB. Skilled in designing RESTful APIs, implementing JWT-based authentication, and role-based access control. Strong foundation in web application security and OWASP Top 10 vulnerability mitigation, with practical exposure to tools such as Nmap, Wireshark, and Burp Suite. Passionate about secure system design and building a longterm career in cybersecurity.

EXPERIENCE

Full Stack Developer Intern - Indux Technology **June 2026 - Present**

- Developing and maintaining scalable SaaS applications using the MERN stack, with a primary focus on building responsive and reusable interfaces in React.js.
- Designing and integrating REST APIs to implement authentication, role-based access control, employee and product management, file uploads, and dynamic data rendering.
- Collaborating with cross-functional teams to build new features, optimize application performance, resolve bugs, and maintain code quality using Git/GitHub.

TECHNICAL SKILLS

Programming Languages: C++,Python, Javascript
Web Technologies : HTML,CSS,React.js
Backend Technologies : Node.js, Express.js, Flask
Databases : SQL, MongoDB, MySQL,SupaBase

Tools and Platform : VsCode, Github, Vercel, Render
Cybersecurity tools : Wireshark, Nmap, Metasploit, Burp Suite, Hydra
OS : Linux , Windows

PROJECTS

Digital Dynamics Review

Tech Stack - Node.js, Express.js, MongoDB, EJS, Bootstrap **Github**

Developed a secure web application for publishing and managing digital reviews using Node.js, Express.js, and MongoDB with JWT-based authentication, role-based access control, RESTful APIs, input validation, and password hashing. Built responsive UI components using Bootstrap and structured MongoDB schemas for efficient content management and cross-device compatibility.

Password Strength & Complexity Checker

Tech Stack - Python , Argparse, API Integration **Github**

Developed a Python CLI tool for password analysis, evaluating strength through length, entropy, character diversity, and modern security standards. Integrated argparse for flexible inputs, breach detection API for leak checks, and packaged as an executable for local security testing.

Expense Tracker

Tech Stack - HTML, CSS ,Javascript, Chart.js **Github**

Built a responsive expense tracker using HTML, CSS, and JavaScript with dynamic transaction handling and real-time balance updates. Integrated Chart.js for visualizing expenses and trends, featuring an interactive UI with categorized tracking and graphical insights.

EDUCATION

B.E in Computer Engineering 2027 Expected
P.E.S Modern College of Engineering, Pune
CGPA : 8.2+

Higer Secondary Education
Priyadarshani Junior College of Arts, Commerce &Science
Percentage : 75.33%

CERTIFICATIONS

Japanese language Proficiency test - JLPT N5

Fortinet Certified Associate in Cybersecurity
Cisco Networking Academy - Networking Basics

TryHackMe - PreSecurity Learning Path

The Linux Foundation - Introduction to Linux

AWS - AWS Cloud Security Foundations

Cisco Networking Academy - Cyber Threat Management
